FERMEC SAS	Busano	TO	http://www.fermec.biz/	We are a precision mechanical workshop located in Busano (TO) sitting on an area of 3200 square meters, 1700 square meters are covered. We work components on CNC machines in series with excellent delivery times and quality. The company's strengths have always been the quality of the processes, the customer care to ensure their full satisfaction and the ability to innovate. We allocate a significant percentage of our revenues investing in machinery and plants renewal, in order to always keep them fully efficient and in step with technological evolution. We have developed our own quality management system certified in reference to the UNI EN ISO 9001: 2015 standard through the TÜV certification body. We manufacture precision mechanical components, mainly subcontracted, in the field of industrial products, gaining experience in manufacturing parts for system and machine manufacturers. Our most used materials: steel, cast iron, aluminum, polymers, Teflon. We manufacture any type of component up to a maximum diameter of 600 mm and a maximum length of 600 mm according to your design. Our experience allows us an in-depth knowledge of this process. Punching, the high reliability of the process ensures greater productivity compared to conventional hydraulic machines which translate into the maximum expression of the productivity / management costs optimization. Bending, we perform precise and efficient bending, the optimal synthesis between solidity and accuracy of the mechanical design and technological innovation in hydraulic and electronic management. Paneling, Our machines do not require set-up times and automatically adapt to the geometry of the panel, revealing a guarantee of productivity. Laser cutting is the process that best meets the needs for quality and speed of delivery. The strengths are speed and precision eliminating downtime. Welding, thanks to the most modern techniques we have welding systems suitable to withstand very high production rates and flexible in terms of use. Finishing, our goal is to make every piece obtained perfect, from deburring to threading. Assembly, we are equipped with regards to the assembly and assembly of particular components of industrial machines of all kinds.	C	533/534
